

One Day RYA Radar Course

In restricted visibility you are required to use all means available to avoid a collision. If you are on a boat fitted with Radar you are required to use it for collision avoidance.

Are you capable? If not join the next Radar course on a **Saturday** 18th February 2012

You will learn

- How to set the radar to give best picture
- How to identify potential collision situations.
- How to decide avoiding action.
- The course also includes sections on how radar sets work, how to navigate in restricted waters in the dark or fog, e.g. entering a harbour.
- Using a radar for position fixing.

No previous knowledge is required, the training is practical, using the latest Radar Simulation software packages. The course includes two work books. Members £60, plus £15 for books non members £70. The class size is restricted to six students. If you are interested have a chat about the course contact Martin Johnson at mandrjohnson@dsl.pipex.com or 07941500 225
